Shaping the Future of Fire Extinguishers

ABC DRY POWDER

This is a premium range of appliances available in ABC Powder, pressurised with dry nitrogen gas/Co2 Cartridge. The contents are expelled by the release of pressure stored inside the body. The inbuilt pressure gauge indicates its readiness for use. ABC powder is one of the most versatile and highly effective agents suitable to combat fires involving wood, inflammable liquids, gases and electrical wiring. This extinguisher knocks down fire by beating and displacement of air.

BC DRY POWDER

Dry Powder extinguisher are highly effective for B Ft C class fires, specially for combating three dimensional or running fires involving inflammable liquids like petrol, paints, solvents or industrial gases. They can also be used on energised electrical equipments. Powder based extinguisher knocks down fire by beating a displacement of air.

Co₂ TYPE

The quick Et efficient flame knockdown property of Co₂ gas makes it ideal for tackling fires involving inflammables liquids like petrol, oil, paints, solvents and industrial gases. It is also suitable for sophisticated machineries. Co₂ extinguishes the fire within seconds by dilution of oxygen and chilling effect.

MECHANICAL FOAM

Foam is a powerful knockdown agent for spill fires involving inflammable liquids such as petrol, oil, naphtha, paints, alcohols Et solvent. This extinguisher forms a thick layer of foam over the burning surface, effectively cutting of atmospheric supply of oxygen to the burning surface thereby smothering the fire and preventing re-ignition. foam extinguishes fire by giving blanketing effect.

CAUTION : Not for use on Electrical fire.
